

# Introduction

QuickSign Bulk Print is an extension to QuickSign which allows you to print a large number of signs created using the Section Scan Load feature of QuickSign in one click, as opposed to pressing Print individually on each sign.

QuickSign Bulk Print was created by Drew Ciaramitaro, for any assistance with the application, feel free to contact [DrewCiaramitaro@pricechopper.com](mailto:DrewCiaramitaro@pricechopper.com).

*This guide assumes pre-existing knowledge on how to use QuickSign's section scan load feature, which is required to use this.*

- [CheckSign section scan load](#)

<https://tadex.github.io/QuickSignSectionScanLoad.html>

on the Save Data button after the update table button, this is the call to start the learning process.

Use the print unknown products button to print out a list of products that are new to the system. You can use it to write down the information and then enter it into the system to better understand the products.

You can now load the Ad Scan report to prepare for the Sunday changover. (Still in testing).

---

Section Scan (Current prices)
Ad Scan (Future prices)

Total Scans Analyzed: 18 - Displaying 15 scans with incorrect prices. 3 unknown products are displayed in red.

- ### 3. Press Go to Bulk Print

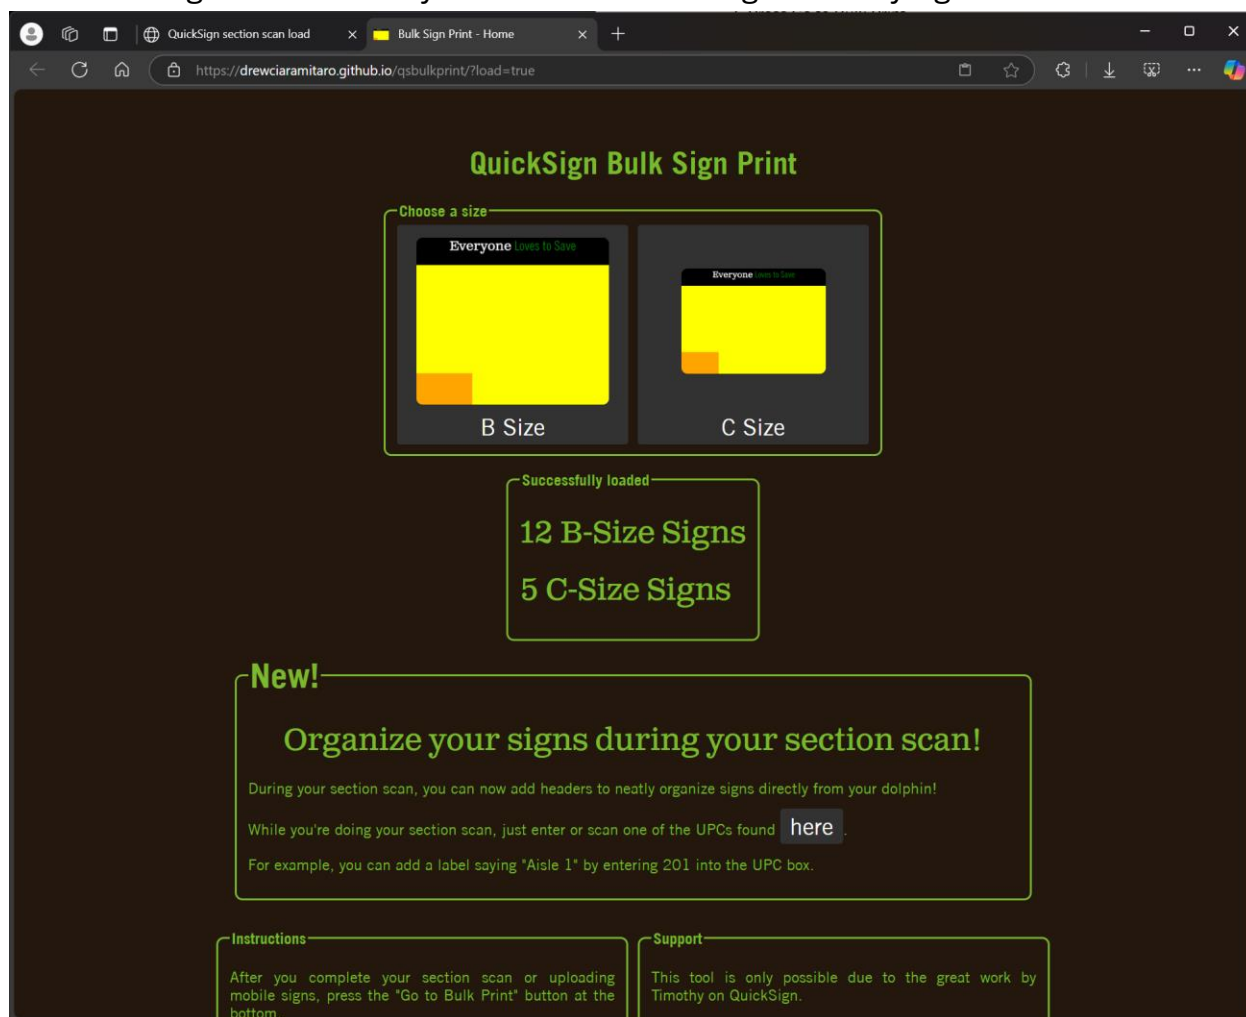

#### 4. Press OK

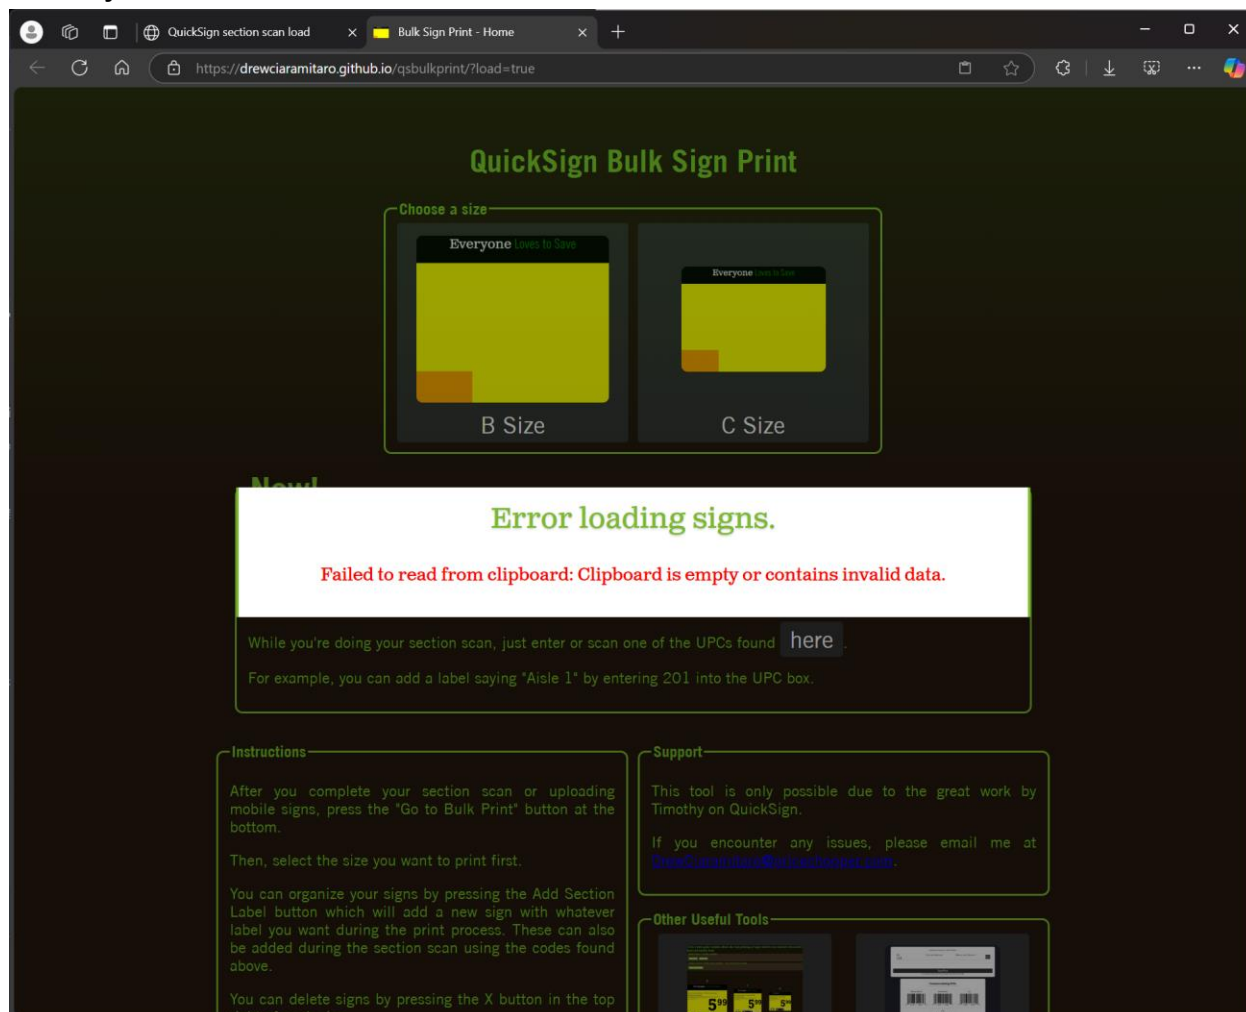

5. The first time you use Bulk Print; you may receive a popup asking to allow access to text and images copied to the clipboard. Press Allow

6. The signs will load and you will see a box stating how many signs were loaded

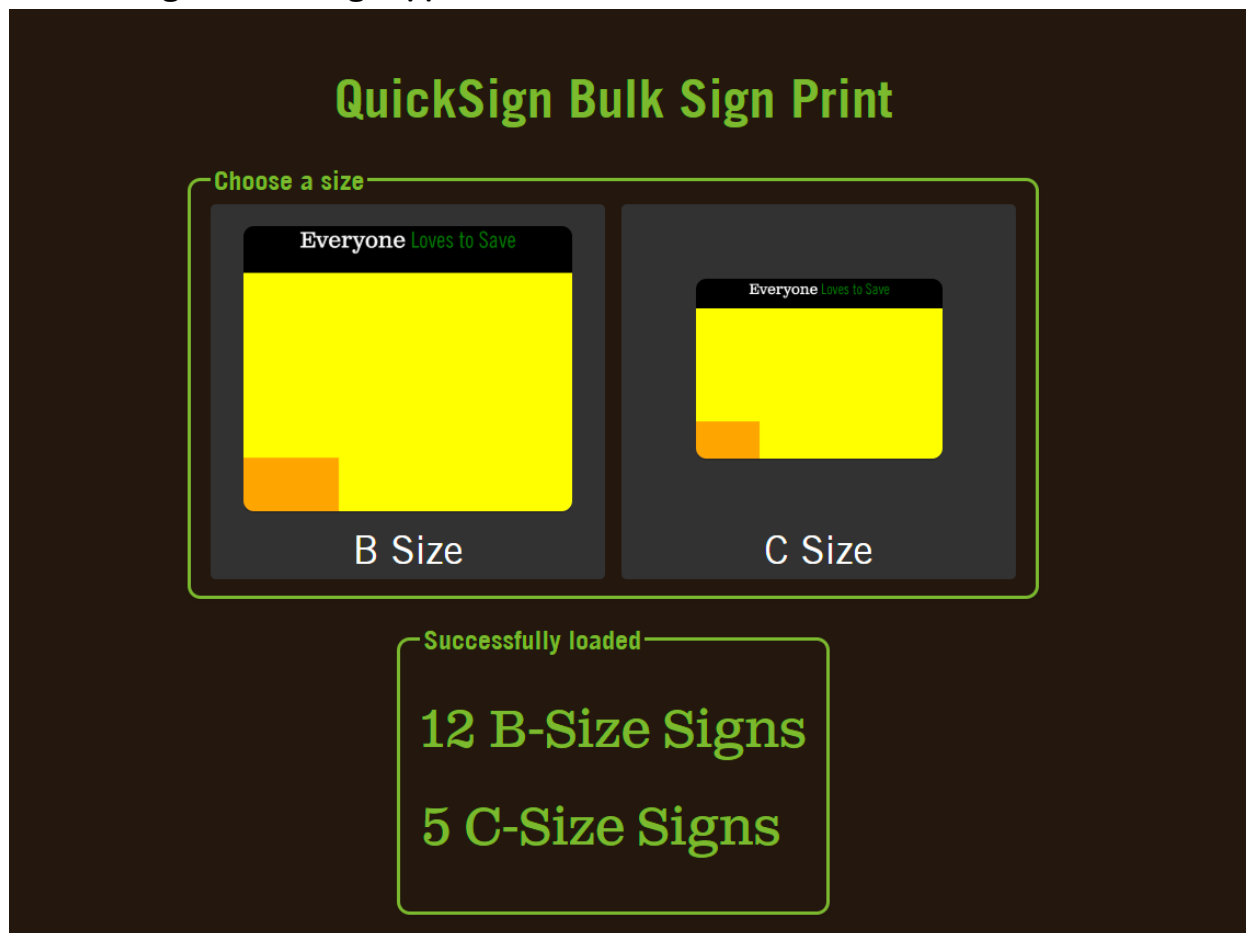

7. If something went wrong, an error popup will show. If this happens, try again from Step 3. If you continue to get errors, contact [DrewCiaramitaro@pricechopper.com](mailto:DrewCiaramitaro@pricechopper.com), and attach your section scan.

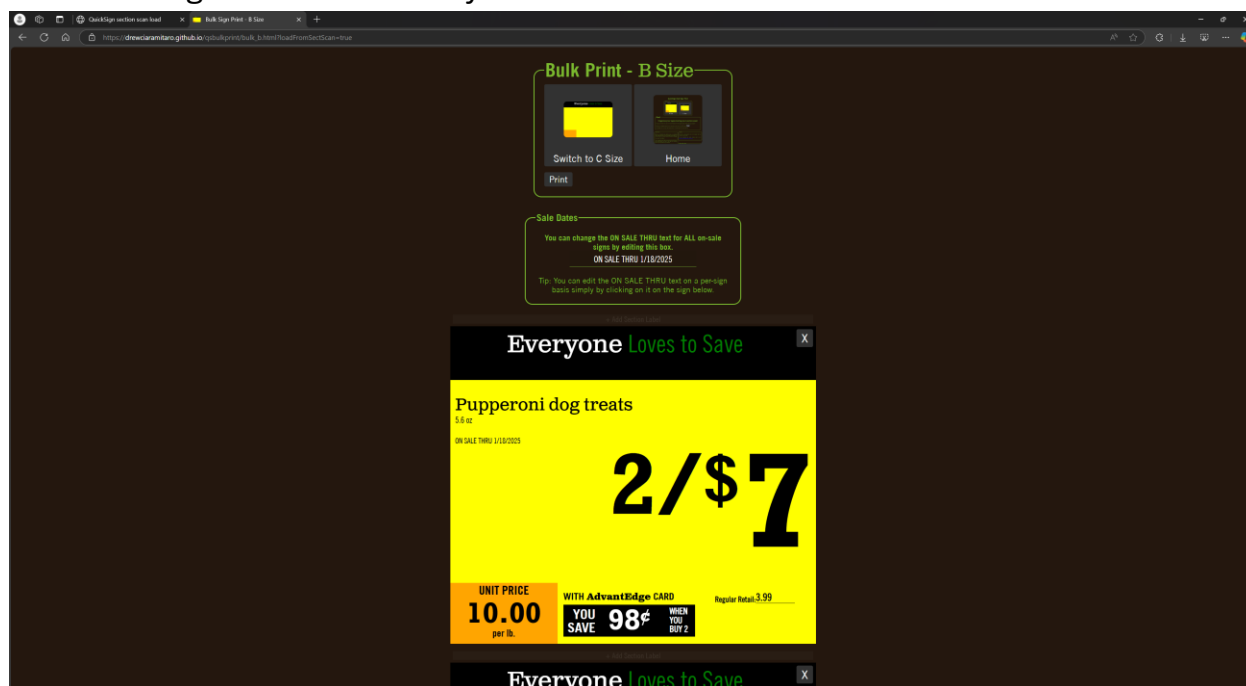

8. At the top of the page, select the size you want to print first.

**Note: QuickSign Bulk Print does not support D-Size signs. You will have to print those from the regular QuickSign application**

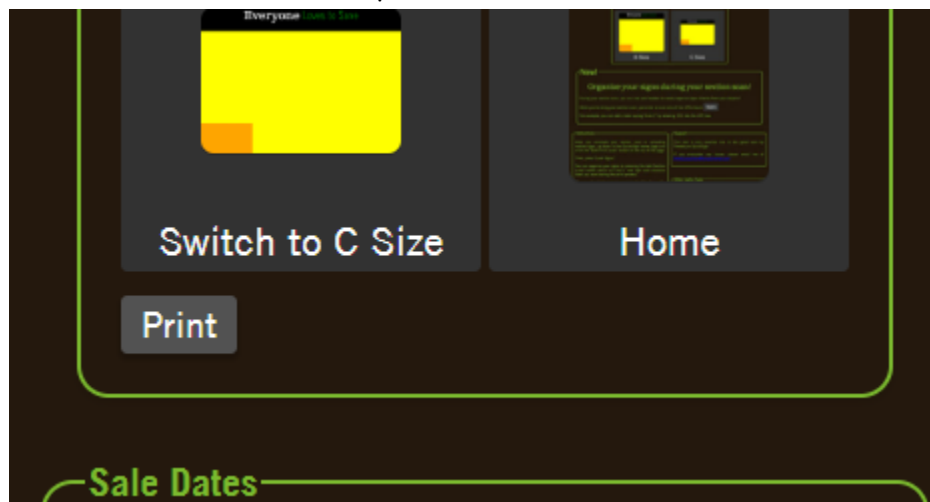

## 9. The signs will automatically load

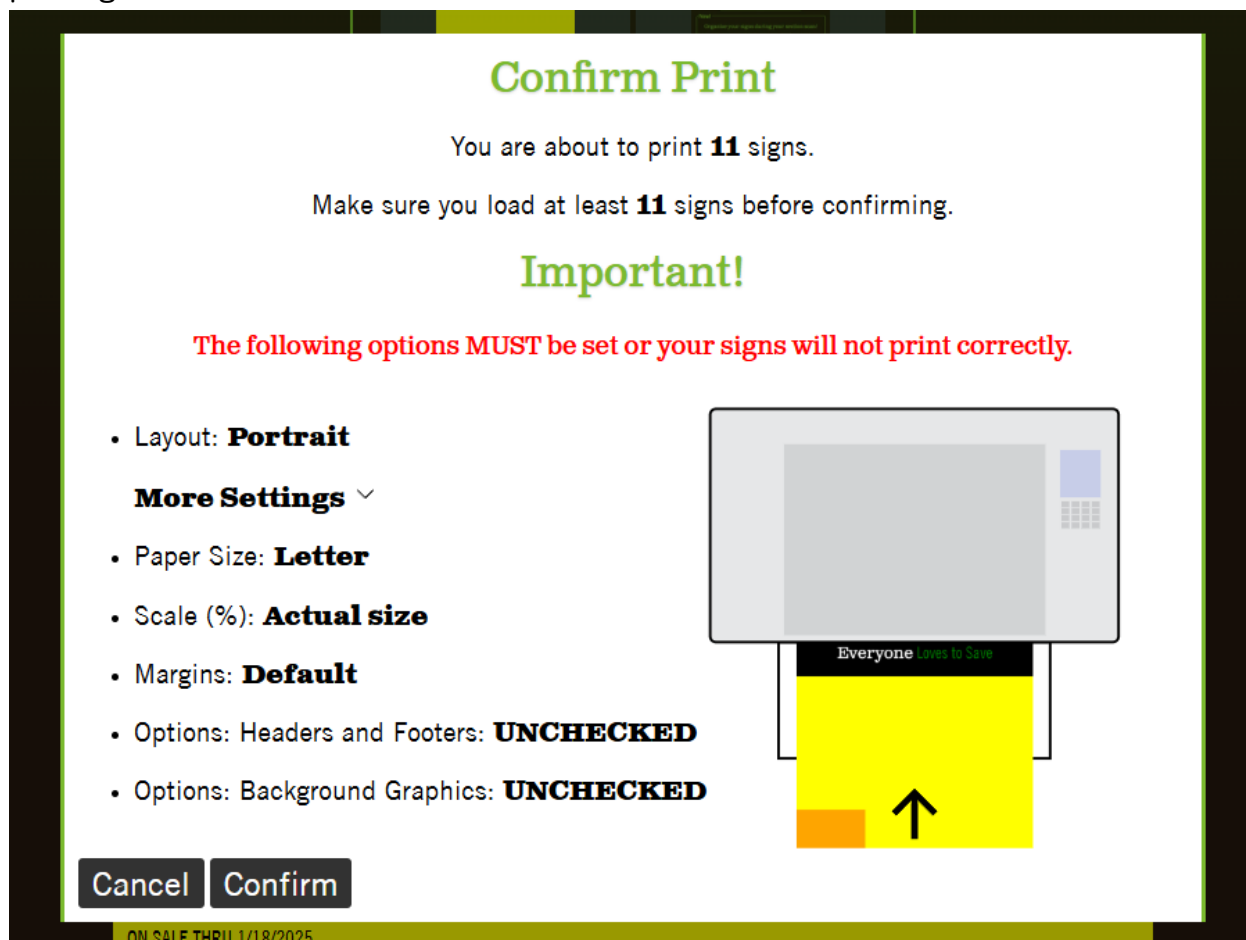

10. Optionally, you can make adjustments to the ON SALE THRU text, the item descriptions, and the item's WHEN YOU BUY X / MUST BUY X text. This is explained in [Additional Sign Adjustments on page 16](#).

11. Press Print at the top

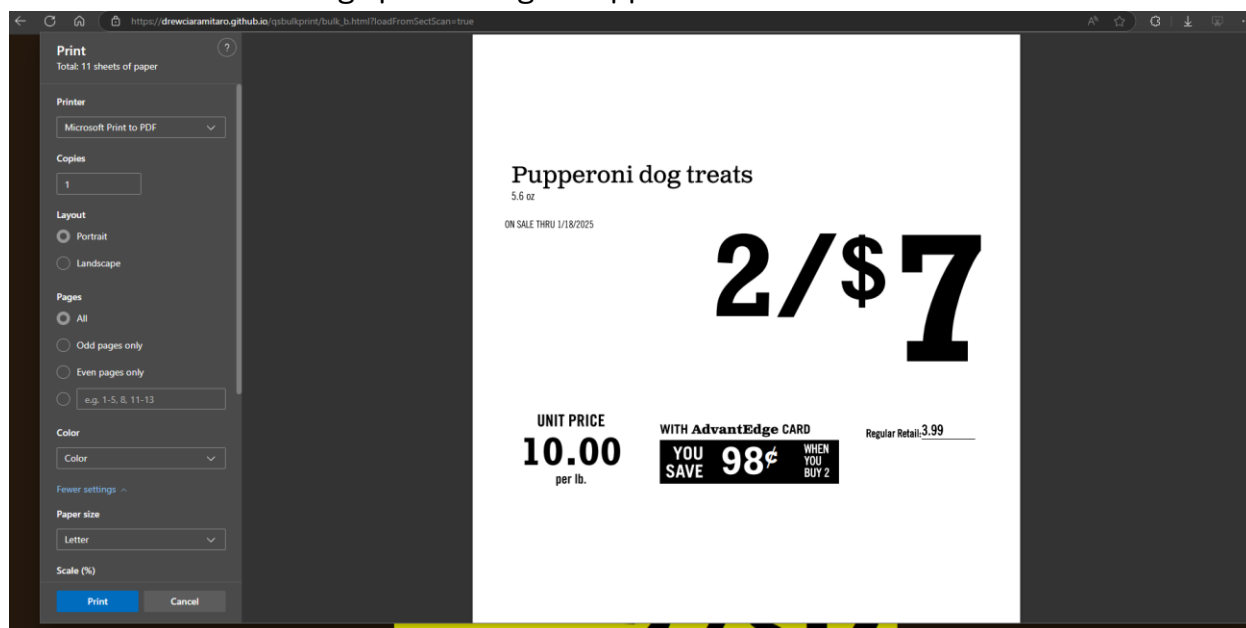

12. A popup will appear. This popup will tell you how many signs you are going to print in total, what settings need to be set in the following print dialog to ensure that the signs print correctly, and a diagram showing how to properly load the signs for the size you are printing.

13. Press Confirm when you are ready

#### 14. The Microsoft Edge print dialog will appear

15. Ensure the settings in the prior popup are set correctly and that you have selected the correct printer,

16. Load the signs, then press Print

17. All the signs will now print in order

a. *Note: C-Sized signs might print very slowly on some printers*

18. Once you're done with the first size, press the Switch to (x) Size button at the top, then repeat steps 9 thru 17.

# How to Use with Mobile Create

This application also allows you to bulk print signs created with the Mobile Create feature of QuickSign.

1. On your phone, go to the [QuickSign mobile create](https://tdzie.github.io/QuickSign/) page
  - a. This can be found at <https://tdzie.github.io/QuickSign/> by clicking on the Mobile Create button

**Mobile Create**

- At the top of the screen, press Bulk Print (size)

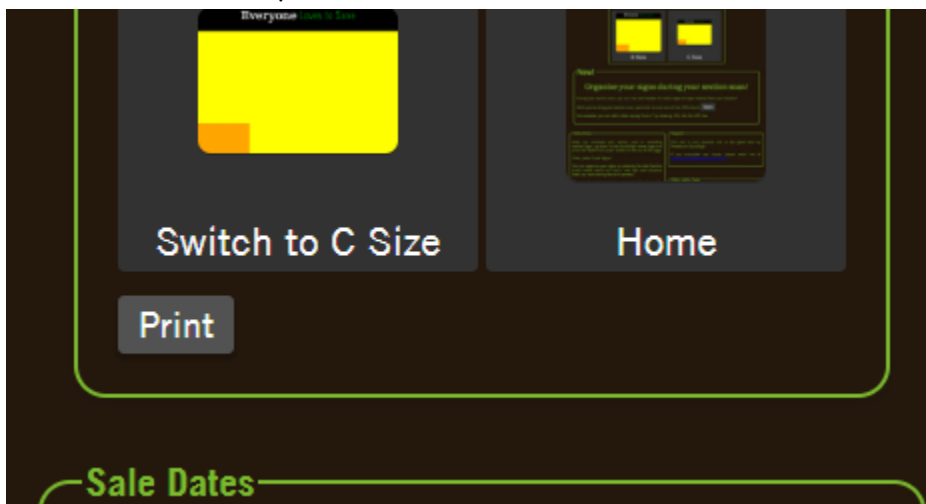

- Press OK

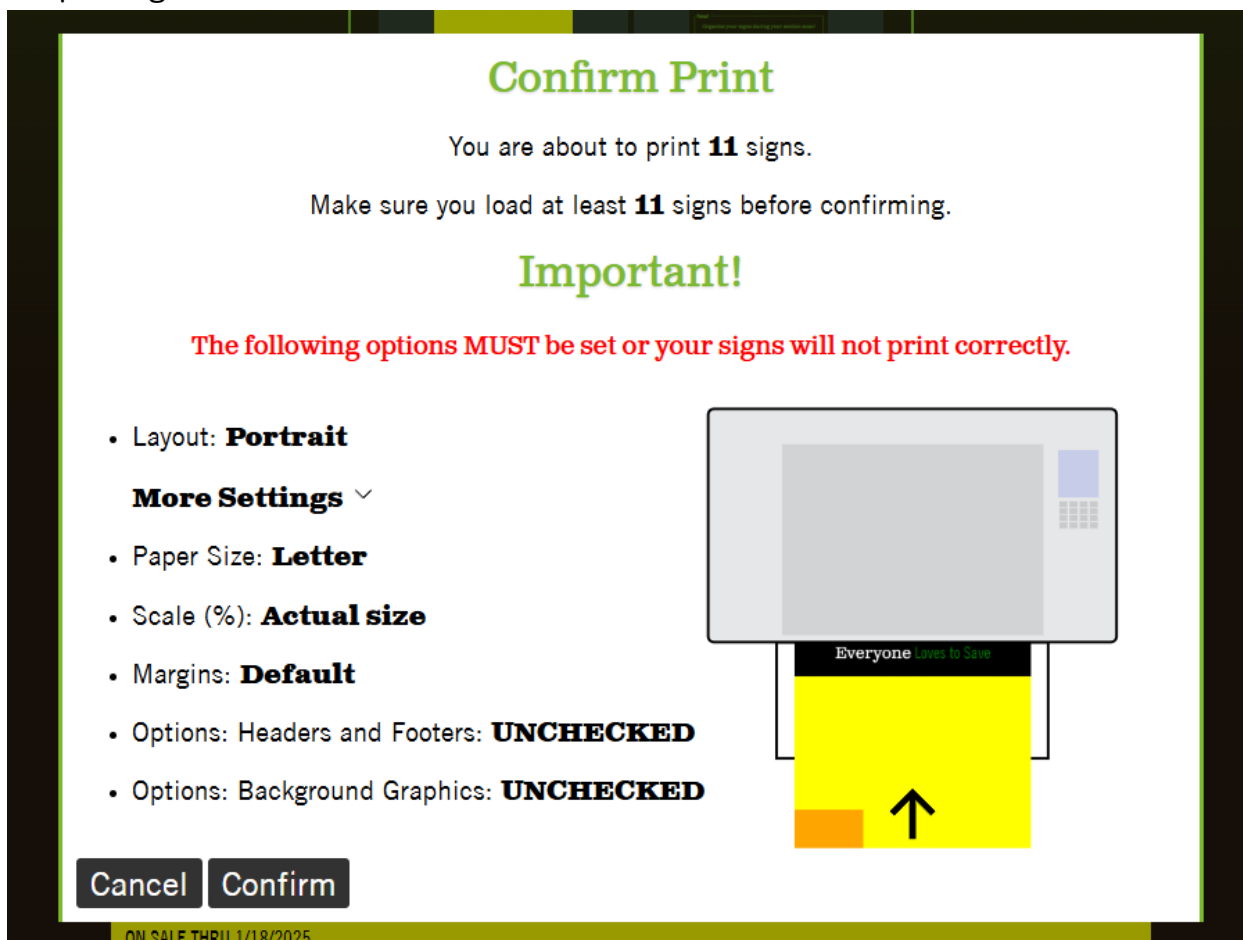

7. The signs will automatically load

8. Optionally, you can make adjustments to the ON SALE THRU text, the item descriptions, and the item's WHEN YOU BUY X / MUST BUY X text. This is explained in [Additional Sign Adjustments on page 16](#).
9. Press Print at the top

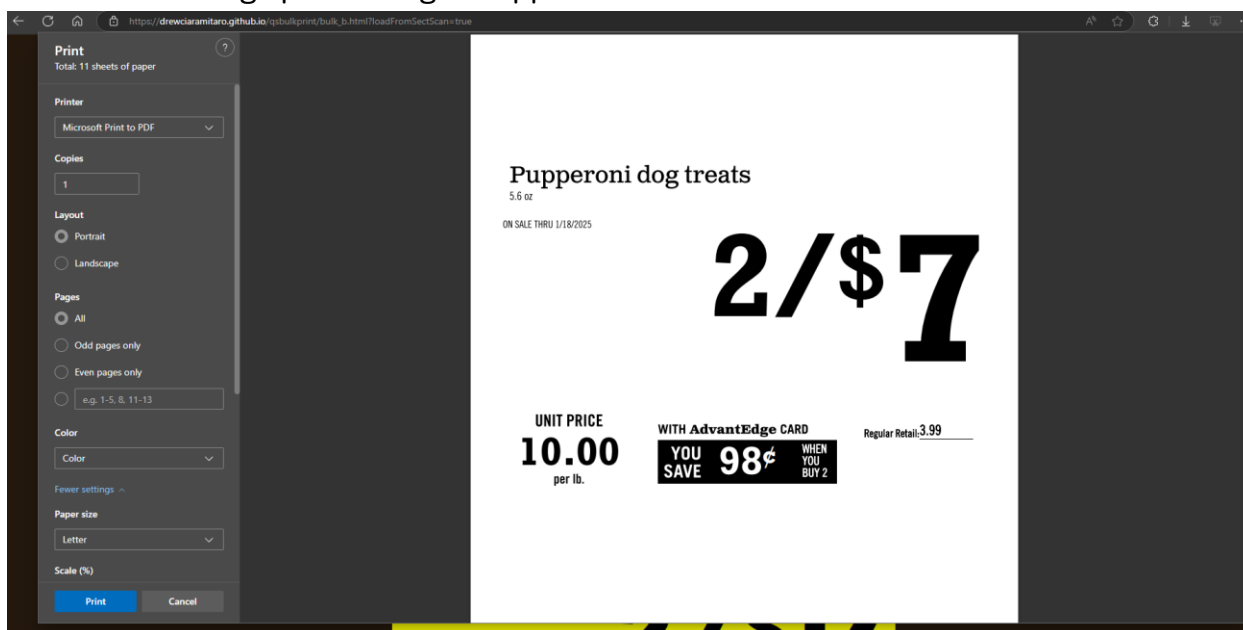

10. A popup will appear. This popup will tell you how many signs you are going to print in total, what settings need to be set in the following print dialog to ensure that the signs print correctly, and a diagram showing how to properly load the signs for the size you are printing.

11. Press Confirm when you are ready

## 12. The Microsoft Edge print dialog will appear

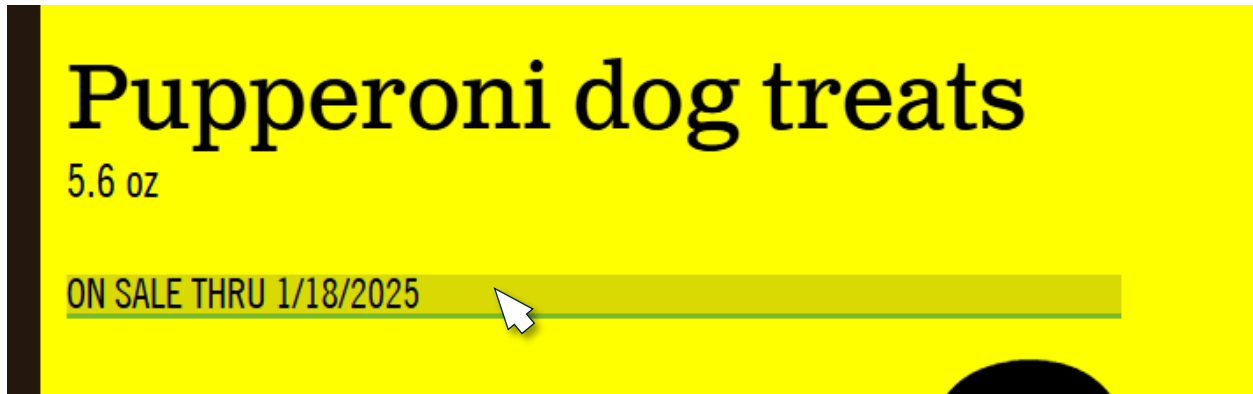

13. Ensure the settings in the prior popup are set correctly and that you have selected the correct printer,
14. Load the signs, then press Print
15. All the signs will now print in order
  - a. *Note: C-Sized signs might print very slowly on some printers*
16. Once you're done with the first size, return to the QuickSign home page, and repeat steps 5-15.

# Additional Sign Adjustments

## Changing the ON SALE THRU text

Changing the ON SALE THRU text can be done in two ways:

1. Hover over the ON SALE THRU text on the sign you want to change, and click, You can then enter the text you want.

2. Edit the text box at the top to quickly change the text for all sale signs. All signs will automatically update. *Note, if you have made a change to a specific sign, it will be overwritten by doing this.*

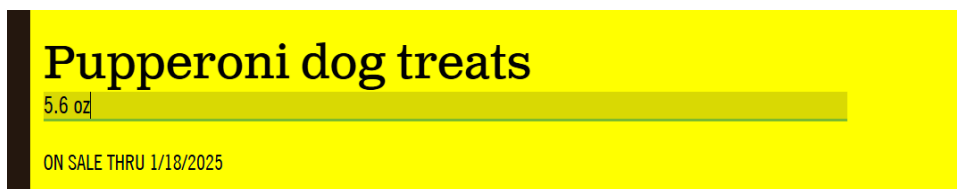

## Change or add the WHEN YOU BUY X / MUST BUY X text

You can modify the WHEN YOU BUY X by hovering over and clicking on the box where the text is located (underneath the large price)

## Change the Item Description text

You can change the item description by hovering over and clicking on the item description on the sign

# Sign Organization with Section Headers

During your section scan, you can quickly add separators between signs to better organize them during printing.

A section header is simply a blank sign with a label that prints out during the printing process, allowing you to separate the signs on a per-aisle or per-department basis.

## Organizing by Aisle or Department

While doing your section scan, you can either scan or enter one of the UPCs from the [Section Scan UPC List](#) to automatically add the separator.

For example, enter 209 to add a header for Aisle 9. This will appear in the bulk print.

Alternatively, you can organize by department by entering 3 then a department number, such as 304 for produce. Department numbers can be found on the [Section Scan UPC List](#).

## Custom Headers

If the aisle or department labels aren't what you need, you can add a custom blank header by entering the UPC '1'. You can then change the text during the section scan load process on QuickSign.

Code	Description	Alt Des.
1	<input type="text" value="FRONT LOBBY"/>	

## Custom / Special Signs

Additionally, this application lets you create a few different custom / special signs that aren't the traditional signs, such as markdown signage or stock-up savings signs where the item has two different sale prices depending on how many you buy.

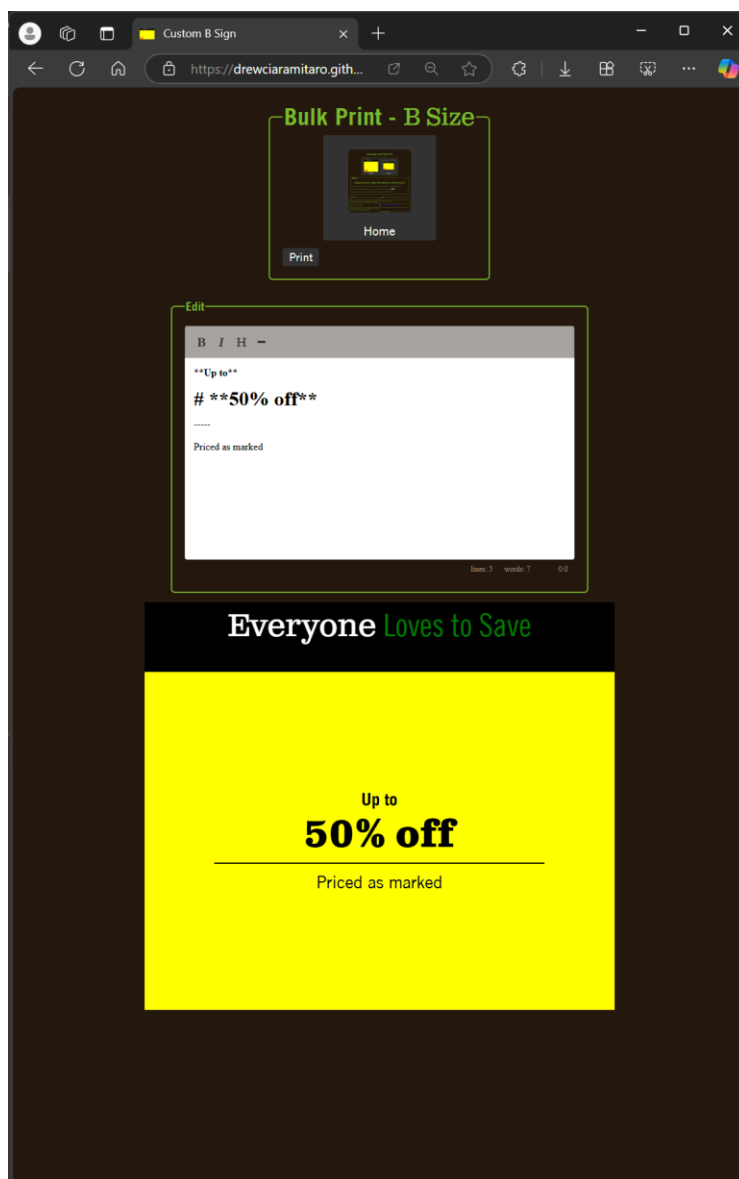

Pressing the Custom Signs button on the home page will bring you to a list of available special sign templates.

Currently, the following signs are available:

## Custom Text on B Sign

- These are useful for general signage that still pops out to guests due to the bright yellow color of the sign. A common use is for markdown tables, where all items are marked down up to 50% off. This template automatically does all the formatting making it much faster than using LibreOffice Writer.

## C-Size with Bonus Points

- This allows you to create a C-Size sign indicating bonus points earned per transaction
- You can edit the item name, description, and sale date by clicking on it directly on the sign
- All other fields are editable in the Edit Sign box

The screenshot shows a web browser window titled "Bulk Sign Print - C Size" with the URL "https://drewciaramitaro.gith...". The interface has a dark background. At the top, there's a section titled "Bonus Points - C Size" with a preview of the sign and a "Print" button. Below this is the "Edit Sign" box, which contains the following fields:

Sale Price	2.99
Regular Retail	5.99
Bonus Points	1000
Must Buy For Bonus Pts	2
Unit Price Type	PER LB.
Unit Size(s)	4 oz.

Below the "Edit Sign" box is a preview of the C-Size sign. The sign has a yellow background with black text. It says "Everyone Loves to Save" at the top. Below that, it says "Example Item" and "4 oz. • all varieties ON SALE NOW". The price "2.99" is displayed in large black digits. At the bottom, there's a section with "UNIT PRICE 11.96 PER LB.", "WITH AdvantEdge CARD YOU SAVE \$3", "1000 BONUS POINTS WHEN YOU BUY 2", and "LIMIT 3 OF THIS BONUS POINT OFFER PER TRANSACTION".

# Signage Gallery

The Signage Gallery page includes a few premade non-pricing signs to easily print instead of having to make your own, such as Out of Order signs, or Western Union Unavailable signs.
